

Wayleave Information Sheet

TasNetworks Wayleave Searches can now be included in your Aus Property Search requests. Wayleave Searches provide an assessment of the location of any TasNetworks transmission line easements within or near the property. Depending on the outcome, issues may arise with any future development of the property.

To include a Wayleave Search in your report, provide details of the customer and the property in question as you do now, then on the Packages page, simply click on the tick-box titled *TasNetworks Wayleave Search*.

The TasNetworks Wayleave Search form will be automatically completed and emailed to TasNetworks for processing. The result of the search will be posted to your office in two to five working days, depending on the complexity of the search.

A copy of the form submitted to TasNetworks will be included in your report, but it will have a watermark indicating it should be replaced with the response from TasNetworks when it arrives.

The TasNetworks fees for this search, plus a 10% service fee from Aus Property Search, will be added to your firm's Aus Property Search account. No fees need to be paid directly to TasNetworks.

If you have any questions about Wayleave Searches, or any other aspect of the Aus Property Search service, please call the Help Desk on 1300 724 066.
